DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamauchi (U.S. Patent No. 5,000,729).

Yamauchi discloses a folding machine to fold a web material with the use of gripping members (Fig. 2, via 12), constructed and arranged to generate a gaseous flow (Fig. 2, via suction passage 17 and 18 and suction hole 15), the mechanical gripping member in absence of a folding blade being constructed and arranged to grasp the web material inserted therein by the gaseous flow, see for example (Figs. 2 and 8-10; via the web been completely folded, sucked, and rotated along with the roller via suction holes 15, with no use of the folding blade); a counter roller (via 8'); on which a projection is provided (via 13'). *Note the web mainly folded via using suction (column 2, lines 24-30), "leading edges of the sheets are attracted by suction to the folding drums".* Once the sheets are attracted and rotated along with the folding drums, this could be equivalent to the claimed "absence of a folding blade".
